# Kostrenske Kostrena - from beach to beach vale, grote i peščići

 ostrena je staro popularno primorsko mjesto, prvi puta spomenuto početkom 15. stoljeća. Smještena je u neposrednoj blizini grada Rijeke, uokvirena uvalom Martinšćica i Bakarskim zaljevom. Kostrenski poluotok dužine je nekih 10 kilometara i blago se spušta prema morskoj obali. Cijelom njegovom dužinom smještene su predivne plaže koje tijekom ljeta posjećuje na tisuće kupača. Po svojoj konfiguraciji, ljepoti, bistrini i visokoj kakvoći mora, s puno malih i većih uvala, položajem prema suncu koje ju cjelodnevno miluje svojim zrakama, Kostrena je prepoznata kao turistička destinacija koju svakako treba posjetiti i upoznati.

Kostrena is an old, popular seaside town mentioned for the first time at the beginning of the 15th century. It is situated in close vicinity of Rijeka, surrounded by Martinšćica and the Bay of Bakar. Kostrena peninsula is about 10 kilometers long, with a mild slope toward the sea coast. Along its length there are many beautiful beaches which are visited by thousands of swimmers during the summer months. Based on its configuration, beauty, brightness and the high quality of the sea with its numerous small and large bays each facing the sun rays that gently touch it throughout the day, Kostrena is a recognized tourist destination worthy of visiting and discovering.

# Uvala Žurkovo

*Žurkovo bay*

04

Žurkovo je jedina uvala u Kostreni trajno nastanjena sve do današnjih dana. Primorske kuće, izgrađene uz sam morski žal, bile su dom mnogim ribarima i pomorcima, a među najistaknutijim Kostrenjanima, rođenima upravo u Žurkovo, je Erazmo Bernard Tićac, koji je, kao glavni projektant, sudjelovao u stvaranju broda »Savannah«, prvog trgovačkog broda na atomski pogon.

U Žurkovo je od kraja 19. stoljeća pa sve do druge polovice 20. stoljeća djelovalo i brodogradilište »škver«, na prostoru kojega i danas mještani popravljaju i uljepšavaju svoje barke i brodice. Uvala Žurkovo sjedište je mnogih udruga ali i odredište zaljubljenika u čisto more i ugodnu šetnju.

Žurkovo is the only bay in Kostrena permanently inhabited even today. Littoral houses, built close to the beaches, have been homes for numerous fishermen and sailors. Amongst the most eminent of Kostrena's population, born right in Žurkovo, is Erazmo Bernard Tićac who, as a leading designer, took part in the construction of the »Savannah«, a ship which was the first commercial ship to use atomic propulsion.

From the end of 19th right up to the second half of 20th century the »škver« shipyard operated in Žurkovo in the area where even today the local people repair and adorn their boats and vessels. Žurkovo bay is the centre of numerous associations as well as a desti-

nation for lovers of uncontaminated sea and pleasant walks.

*Veli jarak beach*  
Plaza Veli jarak

06

plaža je idealna za starije i slabije pokretne kupaće jer se u neposrednoj blizini nalazi parkiralište, pristup je bez ikakvih stepenica, a plaža posjeduje i rampu za ulazak u more.

The beach is ideal for older and disabled people, because of the nearby parking, access directly from the path and a ramp for easier approach to the sea.

# Stijena »Melić«

## *Melić cliff*

 repoznatljivi kostrenski motiv.  
Well known cliff of Kostrena.

# *Pod Markovići*

## *beach*

 dredište mnogih turista, zaljubljenika u ronjenje  
i istraživanje morskih dubina.

Gathering place for many tourists, those who like  
diving and exploring sea depths.

# Plaža Pod Markovići

08

rekrasna, djelomično prirodna plaža, idealna za obitelji i starije ljude.

Beautiful, partly natural beach, ideal for families and old people.

## Plaža Lumbortovo

*Lumbortovo beach*

*Smokvinovo beach*  
Plaza Smokvinovo

## Plaža Smokvinovo

### *Smokvinovo beach*

10

 Smokvinovo ima prirodno i izgrađeno sunčalište, no more je godinama, nekada jednoj od najvećih kostrenskih plaža, nemilice uzimalo oblutke pa je ostao samo uski pojas za kupače.

If one chooses Smokvinovo for swimming, he will find partly natural and partly constructed sunbathing area. Year by year the waves have been taking the pebbles into the sea, so today the beach is very narrow, but still attractive because of the crystal clean water.

## Plaža Pod Capovo

### *Pod Capovo beach*

 miljeno mjesto ljubitelja skokova u vodu.  
Favourite place for those who like jumping into the water.

A scenic view of Uvala Svežanj bay, a popular swimming spot. The water is clear and blue, with a line of buoys stretching across the middle ground. Several people are seen swimming and sunbathing on the rocky shore. A blue flag with a white logo is prominently displayed on a pole in the foreground. The scene is framed by green foliage in the foreground and background.

*Svežanj bay*  
Uvala Svežanj

12

Uvala Svežanj unutar koje je smještena prekrasna prirodna, dijelom šljunčana, a dijelom stjenovita plaža, jedan je od najatraktivnijih dijelova obalnog pojasa Kostrene. Zbog rijetkih i zaštićenih vrsta pronađenih u podmorju, Uvala Svežanj nalazi se u središnjem dijelu uže zaštitne zone područja podmorskog parka.

One of the most attractive natural locations along Kostrena's shore is Svežanj - a bay enclosing a beautiful natural, partly pebbled, partly rocky beach. Because of the rare and protected species found in its undersea world, Svežanj makes a central point of the protected zone - marine park.

Plaža  
Mikulova kava  
*Mikulova kava*  
*beach*

 laža za pse.  
The beach for dogs.

# Plaža Spužvina *Spužvina beach*

 pužvina je odredište mnogih zaljubljenika u prirodne plaže, obitelji sa malom djecom u jutarnjim satima, dok je u popodnevnim, večernjim ali i noćnim satima, zbog blizine ugostiteljskih objekata, biraju mladi.

Spužvina beach is the gathering place for many people - families with babies and children in the morning, and young people in the late afternoons, evenings and nights because of the good bars and cafés in the surrounding.

## Plaža Kamarica

### *Kamarica beach*

 oš jedna od malih kostrenskih plaža, pravi mali skriveni kutak. Ima težak pristup, ali kad se spustiš, gotovo da i ne želiš otići.

Another small beach, a hidden pearl, hard to reach, but just perfect to enjoy.

# Plaža Nova voda *Nova voda beach*

 jedna od najposjećenijih plaža, šljunčana, idealna za obitelji sa malom djecom. Prilaz direktno sa obalnog puta.

One of the most visited beach, pebbled, ideal for families with small children. Access directly from the coastal path.
